

Applicant's Consent Regarding DNA Evidence

I, _____, acknowledge that in support of the the attached application for membership in the Sons of the American Revolution, I am using a DNA analysis report as part of the documentation submitted to establish my lineage. I understand that no applicant should expect privacy of their DNA analysis reports or other supporting documentation forwarded to the National Society of the Sons of the American Revolution. The National Society has the intent of preserving the DNA evidence found in the testing report provided and how it might relate to others who have also provided attached consent forms to use their DNA analysis reports and other evidence to establish their relationship to me. The National Society will not share your or their DNA information with any other entity unless by Order of a Court of Competent Jurisdiction.

I give the NSSAR permission to allow future applicants, including my own descendants, to use the DNA test report regarding my personal DNA and it relevance to my line of ancestors (if permission is not granted, please explain in writing below).
